COURSE DESCRIPTION

An investment is the current commitment of money or other resources in exchange for future benefits, i.e., you sacrifice something of value now and expect to benefit from that sacrifice later. In theory, the rate of return and the degree of risk you bear from the investment are the two major factors to influence investment decisions. Students who take this course will learn how to estimate the rate of return and the degree of risk for financial securities or portfolios and thus make investment decisions.

More specifically, the course objectives include 1) to understand the characteristics of various **financial instruments (財務工具)**; 2) to know **trading mechanisms (交易機制)** for financial instruments in different **securities markets (證券市場)**; 3) to learn the **security valuation methods (證券評價方法)** (e.g., DCF, CAPM, APT, macroeconomic or financial statement analysis, Black-Scholes option pricing formula, etc.) and how to identify over- or under-valued securities; 4) to analyze the **market efficiency (市場效率性)** and thus adopt appropriate **trading strategies (交易策略)** (i.e., EMH and fundamental and technical analysis); 5) to apply the principle of the **portfolio theory (投資組合理論)** to construct your risk-diversified portfolios.

Understanding the content of this course not only give you a sense to manage your wealth but also build a solid foundation for more advanced courses in the finance field in the future.

VERSUS FINANCIAL MANAGEMENT

Some content of this course is similar to that in Financial Management because both courses discuss the financial markets, financial instruments, the valuation of debt and stock, etc. However, the major difference between these two courses is the different viewpoints they stand for. In **Financial Management (財務管理)**, we

study financial and investing decisions for **firms** (more specifically, focusing on how firms invest projects and how they raise the money to pay for these investments), but in **Investments**, we study investment-related knowledge and decisions for **investors**. In addition, the capital structure and dividend policy are exclusively introduced in Financial Management, but Investments pays more attention on portfolio management, security analyses, and trading strategies. After all, some basic tools, like DCF or IRR, are usually taught in Financial Management but not in Investments, so the suggested sequence is to learn Financial Management first and then Investments.

TEXT AND LECTURE NOTES

Lecture Notes: <http://homepage.ntu.edu.tw/~jryanwang/> → Course Information → Investments (undergraduate level)

(The modified PowerPoint files for each week lecture are available after 9:00 p.m. every Wednesday.)

(DO NOT access CEIBA for the syllabus and lecture notes.)

Required Text: Essentials of Investments, by Bodie, Kane, and Marcus, 2016, 10th ed.

(The representative bookstore of this book in Taiwan is 華泰文化. If you decide to purchase the text book together, you can contact Mr. 劉朝棟 via (02) 2162-1217 ext. 113.)

EXAMS AND GRADING

Midterm Exam 50% (on Nov. 9th)

Final Exam 50% (on Jan 11th)

- ※ The exam dates are regulated by NTU. Please ensure that you will be available to attend these two exams before you decide to take this course.
- ※ If you cannot attend the exams due to other reasons, you need to notify me in advance and show me the evidence, e.g., a medical diagnosis. Any late notification is not acceptable.
- ※ The range for each exam depends on the speed of my lecture. On average, I will teach one chapter in a three-hour lecture. The range is not accumulative for the final exam.
- ※ The format of both exams: 30% for term explanation and 70% for calculation problems. Most calculation problems are collected from the quizzes and

questions at the end of each chapter in the required text with minor modifications.

- ※ Students should prepare your personal calculators for the two exams. Scientific or Financial calculators are allowed, but the memorizing function of calculators is forbidden to use.
- ※ To maintain the fairness in the class, there are no make-up exams or other alternatives for the two exams. I will ignore all e-mails asking for any alternative way to make up your grades.
- ※ The rule of ALTERNATE SEATING is enforced. Any dishonesty in the exams will lead to a failed result.
- ※ I will curve your final grades such that the average of the grades in this class is comparable to other classes offered by College of Management of NTU.

RULES IN CLASS

- ※ DO NOT DISTRACT other students from listening to my lecture, e.g., do not chat with other students when I am talking.
- ※ If you have any questions during my lecture, feel FREE to INTERRUPT me by raising your hand.

COURSE OUTLINE

Week	Date	Topic	Reading
1	Sept. 14	Introduction of Investments	Syllabus
2	Sept. 21	Investments: Background and Issues	Ch.1
3	Sept. 28	Investments: Background and Issues Asset Classes and Financial Instruments	Ch. 1 Ch. 2
4	Oct. 5	Asset Classes and Financial Instruments	Ch. 2
5	Oct. 12	Securities Markets	Ch. 3
6	Oct. 19	Mutual Funds and Other Investment Companies	Ch. 4
7	Oct. 26	Risk and Return: Past and Prologue	Ch. 5
8	Nov. 2	Efficient Diversification	Ch. 6

※ Note that the above schedule is an estimated version, I will dynamically adjust the speed of my lecture according to the feedback of students.

OFFICE HOURS

Wednesday 15:30-16:30 and Thursday 15:30-16:30

Room 513, Building 2, College of Management

- ※ It is not suggested to ask academic questions in e-mails. The face-to-face communication is the best way to make me understand your questions and give you the most accurate instruction to solve your problems.
- ※ If you have difficulties in solving the quizzes or questions at the end of each chapter, please ask the teaching assistant first. It is preferred to make an appointment with the teaching assistant rather than ask her questions in e-mails.
- ※ Try to fully utilize my office hours before making an individual appointment.
