課程名稱: Independent Research in Psycholinguistics (英文課程大綱):

This course is designed for PhD students to arrange their experiments and to write up thesis towards fulfilling their degree requirements. PhD students will work with the supervisor to form testing hypotheses, choose appropriate experimental designs, collect data, analyze data, interpret experimental results, and plan for the next experiment. The primary aim is to apply functional Magnetic Resonance Imaging (fMRI) knowledge to language research. PhD students will play a major role in this course and the supervisor will try to assist if necessary. Students will be encouraged to propose their own projects, collect and analyze data, interpret the results, as well as write up reports in American Psychological Association (APA) format.
