## Course Description

This course is about the economics of climate change and climate policy for advanced undergraduate, postgraduate, and doctoral students. Topics discussed include the costs and benefits of adaptation and mitigation, discounting, uncertainty, equity, policy instruments, the second best, and international agreements.

## Required Materials

- Tol, Richard S. J. (2023). *Climate Economics: Economic Analysis of Climate, Climate Change and Climate Policy*. 3rd edition. Edward Elgar Publishing.  
[rtol.github.io/ClimateEconomics/](https://rtol.github.io/ClimateEconomics/)

## Grading

One midterm presentation (April 9, 40%). One final presentation (May 28, 60%).
