

Syllabus

Fall 2007

Practicum in Prosthetics and Orthotics (上)

義肢與矯具學臨床實習 (I)

Course Number: 548 M0981

Credit Hours: 3

Course Prerequisites: Principles of Prosthetics and Orthotics; Research in Prosthetics and Orthotics; Prosthetics and Orthotics Laboratory; Clinical Case Study on Prosthetics and Orthotics.

Course Objective:

The internship is to help students to integrate their knowledge which they have learned from the prerequisites in prosthetics and orthotics and develop clinical intuition and sense. Students will be assigned to practitioners as their supervisors and be scheduled to observe clinical practices particularly on clinical patient management. They are expected to attend scheduled clinics, to finish assigned fabrication work, to participate journal club, to build a patient log and to write report and SOAP notes. The course grade of each student will be based on faculty evaluation on the fulfillment of student's knowledge and skills expectations.

Time: **scheduled by instructor, 10 hours each week.**

Classroom: 水源校區輔研中心
