

課程名稱：企業財管研討一

This Ph.D. course will focus on recent developments in corporate finance. The topics discussed will focus on corporate governance and behavioral corporate finance. One of the purposes of this course is to make students to start their own research as early as possible.

The requirement of this course will include class reports, the term paper, and one examination.

Do the following before the semester starts

Pick one of the top 3 journals (JF, JFE, and RFS),

1. Read abstract and/or introduction of each paper published from 2004-2008 (including forthcoming papers posted on the Journal's website) in the Journal,
2. Classify each paper (see the categories listed below) and save results in an Excel file (including Journal name, article title, author name, and classification),
3. Choose one topic that is related to corporate finance and interests you the most

Do the following during the semester for the chosen topic

1. Pick one paper that has earlier versions on the web. Compare and find out the differences between versions.
2. Do a term paper of an empirical study that is different from the literature in some ways.
