課程名稱：精神科臨床心理實習(英文課程大綱):

Clinical Psychology Internship in Psychiatry

Goal and Objectives:

The internship course is part of the core curriculum prior to completion of the MS in Clinical Psychology Training. This 6-credit course requires of each intern 6 months full-time training in a chosen psychiatry setting (7/1~12/31 or 1/1~6/30). The course aims to prepare interns for the entry level of psychological practice that is based on the science of psychology and that will be mainly operated in psychiatry-

related settings. With practice and clinical supervision, the primary training goal includes: 1) to develop competence and confidence in psychological assessment and psychotherapy for various psychological disorders, 2) to provide service delivery in direct contact with patients and their related persons, and 3) to mature skills of socialization into the clinical psychology profession as well as cooperation with mental health teams.

Training Contents:

1. OPD and Inpatient-ward observations
2. Intakes and Diagnosis
3. Psychological assessment
4. Individual Psychotherapy
5. Group Observations and Co-lead/Lead Therapy
6. Participation and presentation in case conference
7. Clinical presentation of case formulation and related readings.

Internship sites: Department of Psychiatry at Chang Gung Memorial Hospital or Taipei Veterans General Hospital.

Time Period: July 1~December 31 of 2006

Weekly Working Hours: Interns are required to follow the daily schedule of the chosen hospital. Basically, the working schedule starts from 08:30AM ~ 12:30PM and 01:30PM ~ 05:30PM on Monday through Friday, and if required, 08:30AM ~ 12:30PM on Saturday.

Prerequisite:

Prior completion of 6 credits of psychological assessment related courses, 6 credits of psychotherapy related courses, and 9 credits of psychopathology related courses. Permission from the instructor and acceptance from the clinical psychology division of the chosen hospital are required prior to enrollment.
